LG Permits

The LG Permits program, written in Microsoft® Access®, is designed to assist Building and Inspection Departments by maintaining, in a regulatory manner, a vast array of automated permits and associated files. The system is a complete and flexible management tool. It offers full customization facilities to address specific permit requirements.

LG Permits gives you the ability to issue new permits and to inquire into and update existing permits. A detailed Reporting feature is also included.

Accurate Inspection Data is logged by "Inspection Type", "Requested By", and "Inspected By" fields.

Scheduled Inspection Time and Actual Inspection Time interface with Microsoft® Outlook® for detailed inspection listings.

Potential Uses

Training

Our experienced installation and training personnel work with each customer's personnel staff to ensure that your system is configured to meet your specific needs, and that all personnel are fully trained. We strive to quickly make your system an invaluable tool supporting your "real world" system needs.

Support

LGDPC systems are backed by our fully-staffed, full-time Support Center. A toll-free phone call puts you in touch with the Support Center's professional and experienced staff to answer pertinent questions. The Support Center offers a wide variety of additional services such as modem and internet-based support, and advanced training seminars. The Support Center also responds to Support E-mail.
