

Local Government Corporation is pleased to announce our plans for Alabama Resource 2009, to be held in Birmingham on August 27 and 28. For over twenty years, LGC has hosted a users' conference in our home State of Tennessee. Because our customer base has grown so significantly in the Alabama market, we are now able to bring this conference directly to you.

Resource 2009 is where you will:

- **L**earn more about existing features in our software systems that will make you more efficient at your jobs. Our staff has worked diligently to prepare practical, spot-on topics for classes. This is a great opportunity to expand on your knowledge of the system you use daily!
- **G**ather information about the new software features we are working on daily as well as hear more about our future plans for the software. You will also have the chance to see software demonstrations on common products such as Microsoft Excel.
- **C**onnect with your peers from all over the State of Alabama as well as your support reps from LGC. You can finally put a face with that familiar voice that you know from our 800 line support. This conference makes the most of the opportunity to share ideas and knowledge and bring our users and company closer in our working relationships.

Resource 2009 may well be the most informative meeting you attend this year. We can't wait to see you there!
